

PATIENT CARE TECHNICIAN ACADEMY

Boone Hospital Center's Patient Care Technician (PCT) Academy is a perfect way to learn about giving excellent patient care. A PCT performs various direct patient care functions and works closely with a nurse to ensure our patients receive the highest level of personal care. In this academy, you'll receive both classroom and hands-on instruction in direct patient care to prepare you to be a PCT.

How It Works

Our PCT Academy includes a five-week paid training period at Boone Hospital Center. Attendance is mandatory at these training sessions.

After you successfully complete the training, you will be a Boone Hospital Center PCT. There are several options for where and how often you are scheduled to work. This will be coordinated upon your hiring into the position. We will work with you to make sure the schedule meets your availability. At Boone Hospital Center, we have full-time, part-time and flexible scheduling options.

A Pre-Nursing Opportunity

Our PCT Academy offers a pre-nursing opportunity for students with the interest and ambition to work in a real patient care setting. You'll get direct patient care experience that can benefit you as you complete your nursing degree.

Boone Hospital Center has partnered with the Nursing program at Stephens College. If you're interested in our PCT Academy, you may also be interested in applying for the Stephens College Nursing program. Gain valuable direct patient care experience within walking distance of the Stephens campus.

(Note: Acceptance into either the Patient Care Technician Academy or the Nursing program at Stephens College does not guarantee acceptance into both programs.)
